It reproduces with sickening realism charred limbs, crushed faces and eyes melting in their sockets. Simply put, I hated being part of a pack. These include: comedone extractor - a small pen-shaped instrument that can be used to clean out blackheads and whiteheads chemical peels - where a chemical solution is applied to the face, causing the skin to peel off and new skin to replace it photodynamic therapy - where light is applied to the skin in an attempt to improve symptoms of acne But these treatments may not work and can't be routinely recommended.
